III. Important Matters

In the first half of 2026, the Company, guided by Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, comprehensively implemented all decisions and arrangements of the Party Leadership Group of China Electronics Technology Group Corporation (CETC) and the Party Committee of CETC Guorui. Overcoming many unfavorable factors such as complex and changing external environment and continuous rise in raw material costs, we seized the development opportunity of domestic industrial digitization and intelligent transformation and upgrading, focused on core businesses such as intelligent cabling, intelligent conferences, and data center computer room systems, promoted technological innovation and market development, continuously consolidated the foundation of operations, activated development momentum, and maintained a stable overall business quality and efficiency.

During the reporting period, the Company achieved operating revenue of RMB 299.07 million, a year-on-year decrease of 2.36%; net profit attributable to shareholders of the listed Company was -RMB 6.56 million, representing a year-on-year reduction in losses of 8.35%.

(1) Coordinating Internal and External Synergies to Build New Advantages in Market Development

During the reporting period, the Company took precise deployment, technological breakthroughs, and internal and external coordination as core approaches to comprehensively consolidate the foundation of its business development. Focusing on the intelligent cabling, intelligent conferencing, and smart lighting businesses, the Company leveraged its mature product systems, professional supporting services, and customized and differentiated solutions to continuously optimize the quality and efficiency of project implementation and consolidate its core market share.

In the intelligent cabling business, the Company made in-depth arrangements for domestic substitution in sectors such as government affairs, healthcare, intelligent manufacturing, computing power, finance, and airports. It completed the signing of its first airport main terminal building project — the Xiaoshan International Airport project — and continued to supply comprehensive cabling projects including the information construction project for the Shanghai-Hefei dual bases of an industry-leading enterprise, the Inner Mongolia International Conference Center, and the second phase of the new campus of the Civil Aviation University of China. Meanwhile, substantial progress was made in overseas markets, with the supply and delivery of multiple overseas projects achieved through partner channels.

In the intelligent conferencing business, on the one hand, the Company continued to secure new- build and renewal services for video- conferencing projects of leading financial- industry clients,, implementing multimedia integration projects for multiple state-owned banks such as the Agricultural Bank of China and the Postal Savings Bank of China. On the other hand, it successfully won bids for key projects such as energy digitalization framework agreements for China Oil & Gas Pipeline Network Corporation (PipeChina), China Petroleum & Chemical Corporation (Sinopec), and China National Offshore Oil Corporation (CNOOC), as well as government conference renovation projects, achieving incremental breakthroughs in the core energy, government, and enterprise sectors. In addition, the Company launched new professional and high-end products, including the "Huicheng" immersive telepresence high-end conference system and the "Ruiling" new-generation information technology application innovation-based high-end video conferencing system. The full range of self-developed products has been applied in more than ten industry scenarios, with the competitiveness of core products continuously enhanced.

In the smart lighting business, the Company deepened its presence in professional markets such as smart lighting, smart light poles, and photovoltaic controllers, focusing on serving telecom operators, governments, and large EMC (Energy Management Contract) clients, and continued to implement municipal energy-saving projects in Huairou (Beijing), Nantong, and Longzhou (Guangxi).

(2) Deepening Self-Developed Innovation to Cultivate New Momentum for Enterprise Development

In the first half of the year, the Company regarded scientific and technological innovation as a key engine for improving overall profitability and enhancing core competitiveness. It coordinated all business units to increase research and development efforts toward professional, high-end, and intelligent products, achieving phased results in qualification review, technological breakthroughs, product iteration, and project implementation.

Intelligent cabling products successfully passed system audits including the Energy Management System (GB/T23331), Product Carbon Footprint Certification (ISO14067), and Greenhouse Gas Verification Certification

(ISO14064), and completed the acceptance of the provincial enterprise technology center. Intelligent conferencing products continued to deepen self-developed innovation. The full range of Ruijing products completed the upgrade of the RK3588 hardware platform, incorporating AI large model hardware acceleration capabilities and integrating AI agent and RAG technologies, enabling the implementation of smart functions such as venue spatial awareness, unified scheduling of conference resources, intelligent minutes generation, and digital intelligent operations and maintenance. Smart lighting products deeply participated in the formulation of the national standard for Single-Lamp Controllers, achieving a transformation and upgrade from product output to standard leadership. The Company developed multi-dimensional solutions including intelligent LED energy-storage street lights, smart light poles, and PV-storage integrated lighting, laying a solid technical and industrial foundation for deep participation in new-type smart city construction and positioning in the green and low-carbon industry track.

(3) Deepening Internal Management and Control to Activate New Momentum for Company Development

During the reporting period, the company established a lean control system for the entire process and comprehensively implemented cost reduction and efficiency improvement work. Establish a management mechanism of "annual budget breakdown, monthly indicator assessment, and rigid performance linkage", to refine and decompose key financial tasks such as operating indicators, cost control, and financial pressure reduction, and ensure that they are assigned to individuals and assessed on a job basis. Comprehensively strengthen cost control, strictly control redundant expenses, optimize expense structure, and reduce expenses by 9.23 million yuan year-on-year in the first half of the year, a decrease of 14%. Simultaneously consolidating the foundation of procurement management, conducting unified registration, review, and annual evaluation of qualified supplier lists, implementing dynamic supplier management mechanisms, and building a cost control defense line from the source of procurement. Seize the favorable opportunity of overall relocation, coordinate the revitalization of idle stock properties, optimize the layout of office space leasing, and effectively improve operating income and internal management efficiency. We will coordinate and implement comprehensive security and compliance control, steadily promote key tasks such as confidentiality management, network security, safety production, and quality control, comprehensively safeguard the bottom line of enterprise operation security, and ensure the smooth and orderly development of the company's operations.
